

# ORTHOPEDIC PROCEDURES

## 1. PALPATION FOR PATELLAR LUXATION (slipped kneecaps):

Patellar luxation is a common and potentially crippling disorder in many breeds of dogs (both large and small!). A veterinarian can identify the condition and its severity through manual manipulation of the stifle joint. OFA has a patellar registry and will register dogs that are found normal at over 12 months of age. Dr. Dawn Bromley will be doing the evaluations. Fee will be **\$15** per dog, or a litter rate of **\$8/dog** for one owner bringing 3 or more dogs. OFA forms will be signed after the exam and the owner can send them in with the appropriate fees. Remember, OFA fee will be only \$7.50/dog.
