Scott County Kennel Club **I**nc.

offers our annual

CANINE GENETIC SCREENING CLINIC

Sunday, September 13, 2015
Preemption Veterinary Clinic
1706 Hwy 67
Preemption, IL 61276
Ph. 309-534-8112
9:00 am to **4:00 PM**

Paperwork procedure:

1. Fill out a separate form for each type of procedure; include phone number and breed on EACH form!
2. All procedures must be scheduled and paid for in advance
3. Upon receipt of your paperwork and check, we'll send you a return card with your exact appt. times. Every effort will be made to group your appointments at the various stations close together.
4. If you want to save time at the clinic filling out paperwork, the ACVO (formerly CERF) forms can be sent to you in advance. **Include a LARGE SASE that will hold the forms requested (that means you must include postage!!).** Remember, our Club pays $2/form, so if you botch one, we'll have to charge you for a new one. All OFA forms can be downloaded from their website (www.offa.org) and partially filled out in advance.
5. OFA is continuing their special. We will have stickers available to allow you to register each procedure at OFA for half price. Checks for the various procedures may be combined and made payable to SCKC. In some cases, you may have to make a separate check out to OFA as well; read their instructions.
6. All forms require AKC (or other) registration name and number, as well as reg. #'s of sire and dam. Some procedures now oblige you to include a copy of the actual registration slip with the OFA form and check. Please bring several copies of your dog's registration slip so all paperwork can be completed.
7. Positive identification is preferred for all procedures and required for some (ACVO/CERF). You can have your dog microchipped at the clinic. If your dog is already chipped, we will have a universal scanner available to read the ID number. If your dog has a foreign chip, please bring your own reader.
8. Directions are below; please save this front page after filling out forms.

Send completed forms and checks to:

KAREN POUDER
19121 12th Ave. N.
East Moline, IL, 61244.
(309) 496-2241

Please return by August 31, 2015 if possible; demand is always high and we often have to turn people away who waited too long!

SCOTT COUNTY KENNEL CLUB, INC.

ALL-BREED EYE CLINIC

Sunday, September 13, 2015
9:00 a.m. – 4:00 p.m.

Preemption Veterinary Clinic
1706 Highway 67
Preemption, Illinois 61276

****

A Board Certified Veterinary Ophthalmologist will conduct the examinations and issue certificates.

ALL EXAMINATIONS WILL BE BY PRE-REGISTRATION ONLY!

You will be given specific time(s) by return mail.

Appointment times will be made on a first-come, first-served basis: however if you have a preference we will try to accommodate. **IF YOU WANT TO SEND YOUR ACVO (American College of Veterinary Ophthalmologists—formerly CERF) EXAM RESULTS TO OFA, YOUR DOG MUST BE POSITIVELY IDENTIFIED! THAT MEANS WE MUST CHECK THE TATTOO OR MICROCHIP. IF YOU HAVE A FOREIGN, 15-DIGIT OR AKC CHIP, YOU MUST BRING YOUR OWN READER SO THE CHIP CAN BE VERIFIED!! OUR "UNIVERSAL" READERS WILL NOT READ THEM.** Please have the tattoo site shaved. . You may request CERF forms, in advance only!

Fee is $30 for each dog.

Make checks payable to **Scott County Kennel Club** and send with completed form to:

Karen Pouder
19121 – 12th Ave. N., East Moline, IL. 61244
(309) 496-2241

I want _____ACVO forms sent ahead (how many?), **SASE must be included or forms won't be mailed!**

PLEASE RETURN THIS FORM AND CHECK BY AUGUST 31, 2015
Bring completed ACVO OR CERF forms with you on day of clinic

NO APPOINTMENTS WILL BE SCHEDULED WITHOUT A CHECK IN THE FULL AMOUNT

ORTHOPEDIC PROCEDURES

PALPATION FOR PATELLAR LUXATION (slipped kneecaps):

Patellar luxation is a common and potentially crippling disorder in many breeds of dogs (both large and small!). A veterinarian can identify the condition and its severity through manual manipulation of the stifle joint. OFA has a patellar registry and will register dogs that are found normal at over 12 months of age. Dr. Dawn Bromley will be doing the evaluations. Fee will be **$15** per dog, or a litter rate of **$8**/dog for one owner bringing 3 or more dogs. OFA forms will be signed after the exam and the **owner** can send them in with the appropriate fees to OFA. Remember, OFA fee will be only $7.50/dog.

Total included for orthopedic procedures _____

BLOOD DRAWS

Thyroid Disease:

Hypothyroidism is a common disorder in many dog breeds. The problem has been to differentiate between the inherited form (autoimmune thyroiditis, also called Hashimoto's Disease) and other types of non-hereditary low thyroid conditions. There is now a specific test panel, which not only recognizes normals, but also can distinguish between Hashimoto's and other types of hypothyroid conditions. This panel (which actually consists of three specific tests (free T4 by dialysis [fT4d], Thyroglobulin autoantibody [TgAA], and canine Thyroid Stimulating Hormone [TSH]) is only done at the Vet School laboratories at Michigan and Cornell. Dogs that do not have Hashimoto's can be registered through OFA 's Thyroid Registry. At the clinic, OFA forms will be filled out, blood will be drawn, the serum separated, and the samples sent to Michigan. Results will be sent to the owners. Fee for the new Thyroid Test will be **$80.00** (which includes the blood draw, separating and shipping, the lab fees). A separate check for $7.50 to OFA will be required. Dogs that do not pass the thyroid test will have their OFA fee returned.

Breed(s) to be tested: .....

I want _____ dogs tested for Thyroid @ $90.00, _____

TOTAL ENCLOSED FOR BLOOD DRAWS..... **_____**

CARDIAC SCREENING

Screens will involve stethoscopic auscultation by the veterinarian.

OFA forms will be available for certification:

Dogs under 12 months of age can be temporarily registered in the OFA data bank for a fee of $10 (half price would be $5). Dogs over 12 months that are found to be normal can be registered with OFA for a fee of $15 (price will be reduced to $7.50 with sticker). **If you wish to register with OFA you will need to send the form directly to OFA with your check made out to OFA!**

OFA cardiac certification will indicate the age at evaluation. It will also include OFA certification indicating who performed the evaluation: Cardiologist, Internist, or General Practitioner. This year, the tests will be performed by a General Practitioner. Dogs that are found to have congenital heart disease can be registered with OFA at no charge. Dogs that are found to be abnormal by auscultation can be referred for follow-up to a facility that offers echocardiography, Doppler cardiac ultrasound, etc. to complete a specific diagnosis (between innocent murmurs and potentially serious hereditary heart diseases).

DENTITION EXAMINATION

For breeds whose standard requires full dentition. Examination can only been done after adult teeth are fully erupted.

Dr. Dawn Bromley, Veterinary Clinic, Preemption, Illinois will be doing the screening:

I WANT TO REGISTER ..... DOGS FOR DENTITION EXAMS @ $25.00 PER DOG
total enclosed ..…….....

MICROCHIP PLACEMENT:

One of the ways to comply with AKC's identification requirement is the microchip. Placement is as quick and easy as getting a vaccination. The chip is injected subcutaneously at the top of the shoulder blades. We will be using the Pro-ID or Buddy-ID brand (readable with a Universal or Avid reader). We will have a universal scanner with us that can most types of microchip, except foreign. The fee will be **$16**, and will include placement of the chip, visualization of the number by scanner, a collar tag and bar code sticker and the form for AKC. Registration with AKC, which is just $9, is extra and that check should be forwarded **directly to AKC**.
